

AUTHOR

Name – Sri Harsha Reddy Sagili

Roll No – 22f2005056

Email – 22f2005056@ds.study.iitm.ac.in

About me – My name is Harsha and I am currently studying at the Diploma level in the IITM online degree program. I leverage data to solve real world problems and make strategic decisions.

DESCRIPTION OF PROJECT

This project is designed to provide a platform for engagement between sponsors and influencer.

TECHNOLOGIES USED

- **Flask:** Backend framework for building the web application.
- **SQLAlchemy:** ORM (Object-Relational Mapping) tool for database interactions.
- **SQLite :** Database management system for storing application data.
- **HTML/CSS/JavaScript:** Frontend technologies for user interface design and interactivity.
- **Bootstrap and Jinja 2**

ARCHITECTURE

My project code for IE&S is inside the IE&S folder.

- **contollers.py** – contain all or most of the backend validation
- **Models.py** – This contains DB Classes
- **Templates** – This contains all HTML templates for User, Librarian, authorization
- **Static** – This contains CSS and image files

My models:

Campaign Request	Campaign	Influencer	Sponsor	User
id	id	id	id	id
campaign_id	title	user_id	user_id	username
influ_id	description	name	industry	password
spon_id	end_date	platform	name	role
req_status_influ	budget	followers	flagged	
req_status_spon	spon_id	flagged		
budget	proof			
end_date	flagged			
influ_name	progress			
influ_followers				
note				
completed				
completion_confirmed				
title				
description				
chart				

FEATURES:

1. We can create Campaign, Sponsor, and Influencers
2. Admin can delete any Campaign, Sponsor or Influencer. But by removing a influencer or sponsor all the campaigns related to them will also be deleted.
3. There is a search bar which searches for Campaign based on title.
4. A sponsor a request a influencer to accept a campaign and vice versa.
5. And that request will be shown in the requested party's dashboard.
6. If request is accepted it will be displayed under active campaigns under both the parties Dashboard.
7. If the influencer completes a campaign, they need to send proof to the sponsor. until sponsor verifies that proof, the campaign will be there in Completed Campaigns(to be verified).
8. After the sponsors approves the campaign completion. The campaign will come under the completed campaigns for both the influencer and sponsor.
9. The Sponsor can also Edit and Delete the campaigns.
